Decorative Braces

14

3/4" wide

The dark blocks are flat floor tiles. You will have to trim one down to 3/4" wide.

15

This sheet shows a brick-by-brick layout of the prison tower. Row 1 is the first row of blocks, all the way up to row 15 which are the top crellenations.

If you want to take this model apart in sections, mark where "not to glue" using a marker on the blocks. These marks will serve as a reminder for you later on (it's real easy to forget and end up gluing the whole thing together).

First Level

Top Step

Front
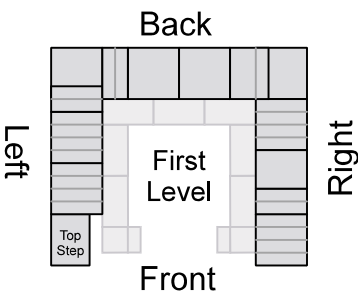

Here are the views of each of the stair pieces that go around the edge.

You will have to sand the sharp bottom off the first stair block.

Here's the underside view of the corner brace.

Arch

Right

The large arches support the 1" flat tiles.
