Small Roof Template

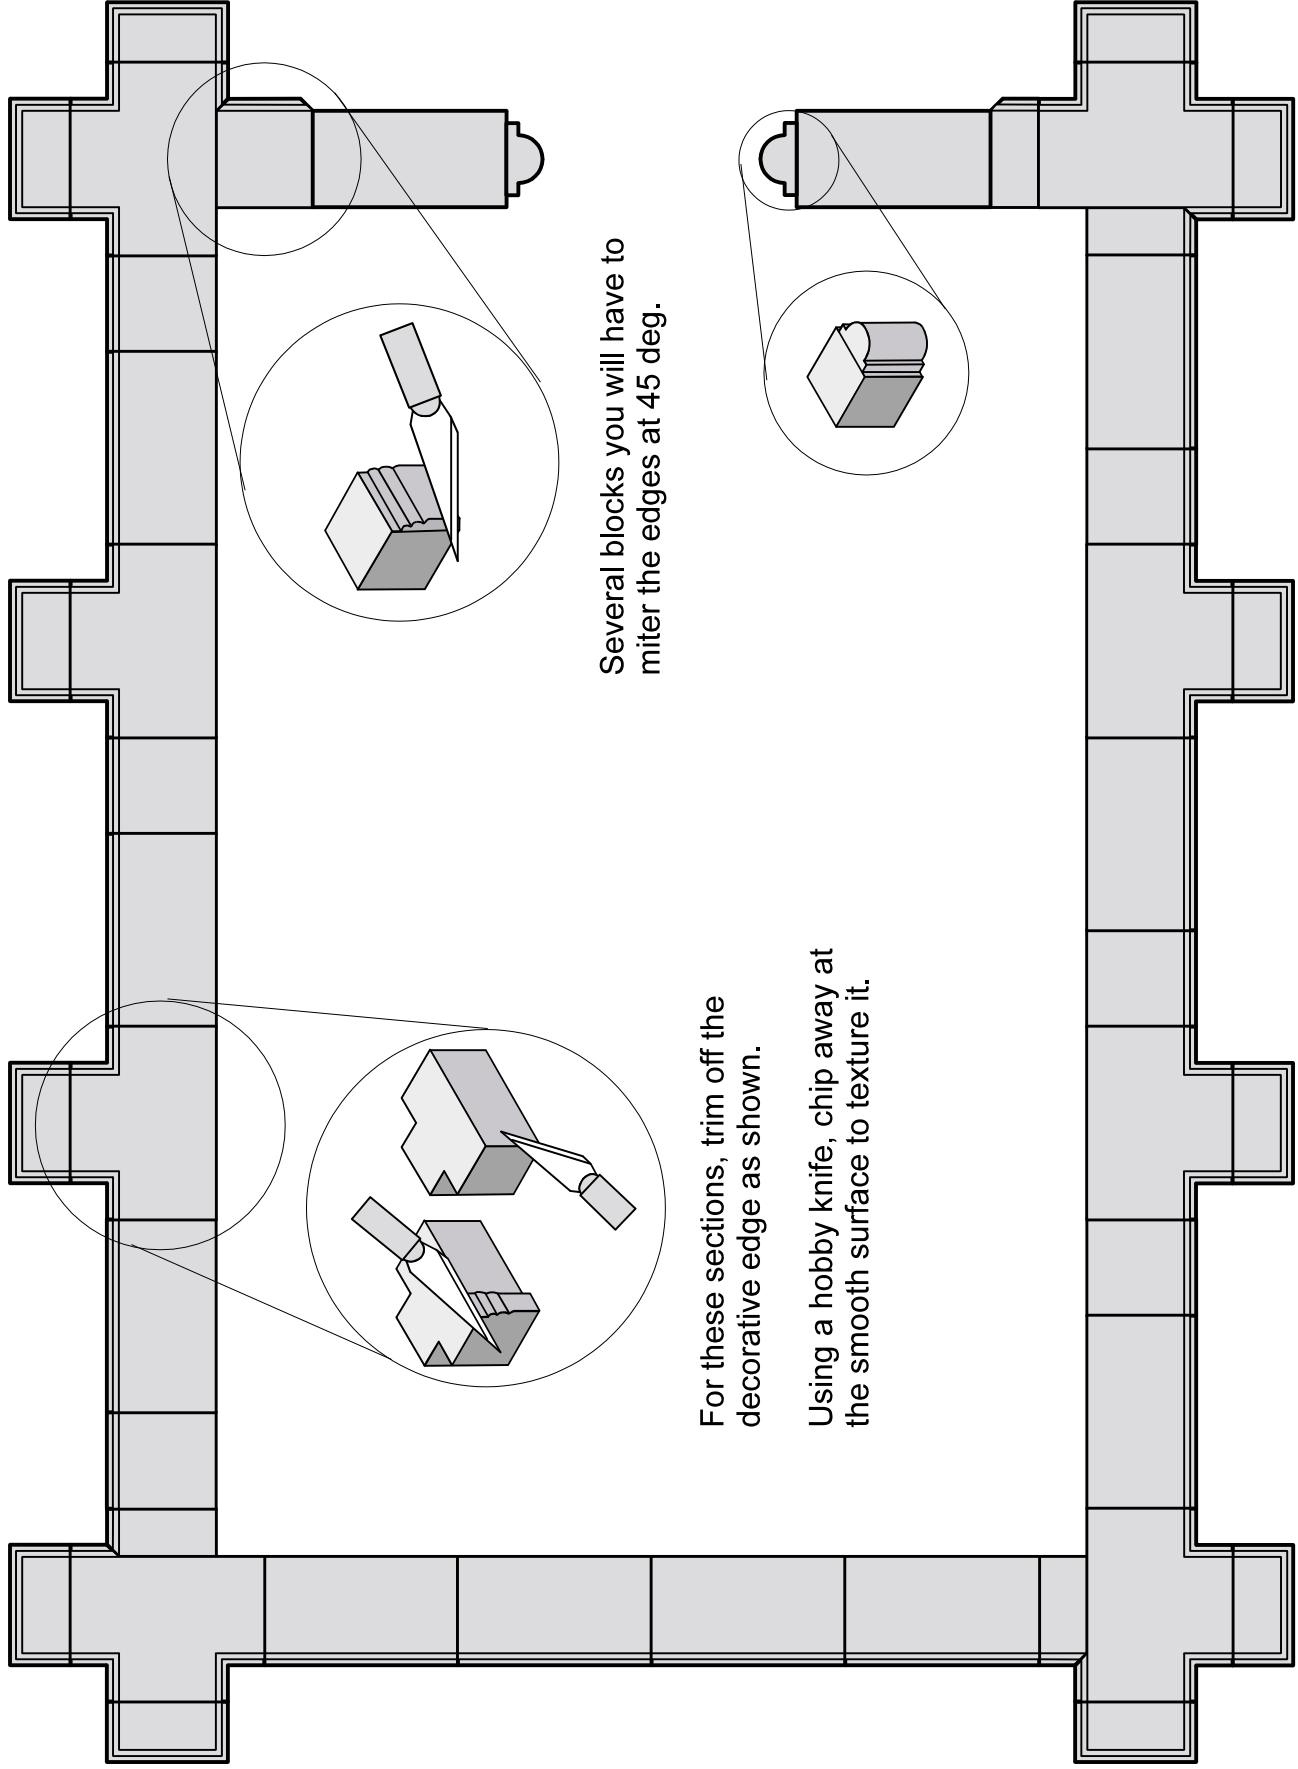

Gothic Church

Tape this plan down to the table. Lay your blocks directly on this plan and glue them together. Do not glue them to this paper!

Assemble and glue the 2 side braces. Glue the flat side of these braces onto the wall indicated by the light shaded area.

Gothic Church Floor Plan

For these sections, trim off the decorative edge as shown.

Using a hobby knife, chip away at the smooth surface to texture it.

Several blocks you will have to miter the edges at 45 deg.

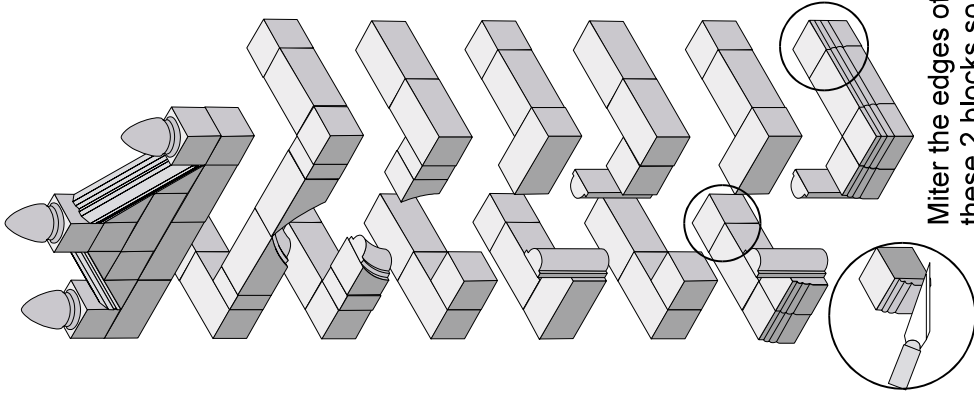

Glue this floor plan down to a piece of thick card stock like a cereal box. Glue the base trim blocks to each other **but not to the floor plan.**

Gothic Church

Tape this plan down to the table. Lay your blocks directly on this plan and glue them together. Do not glue them to this paper!

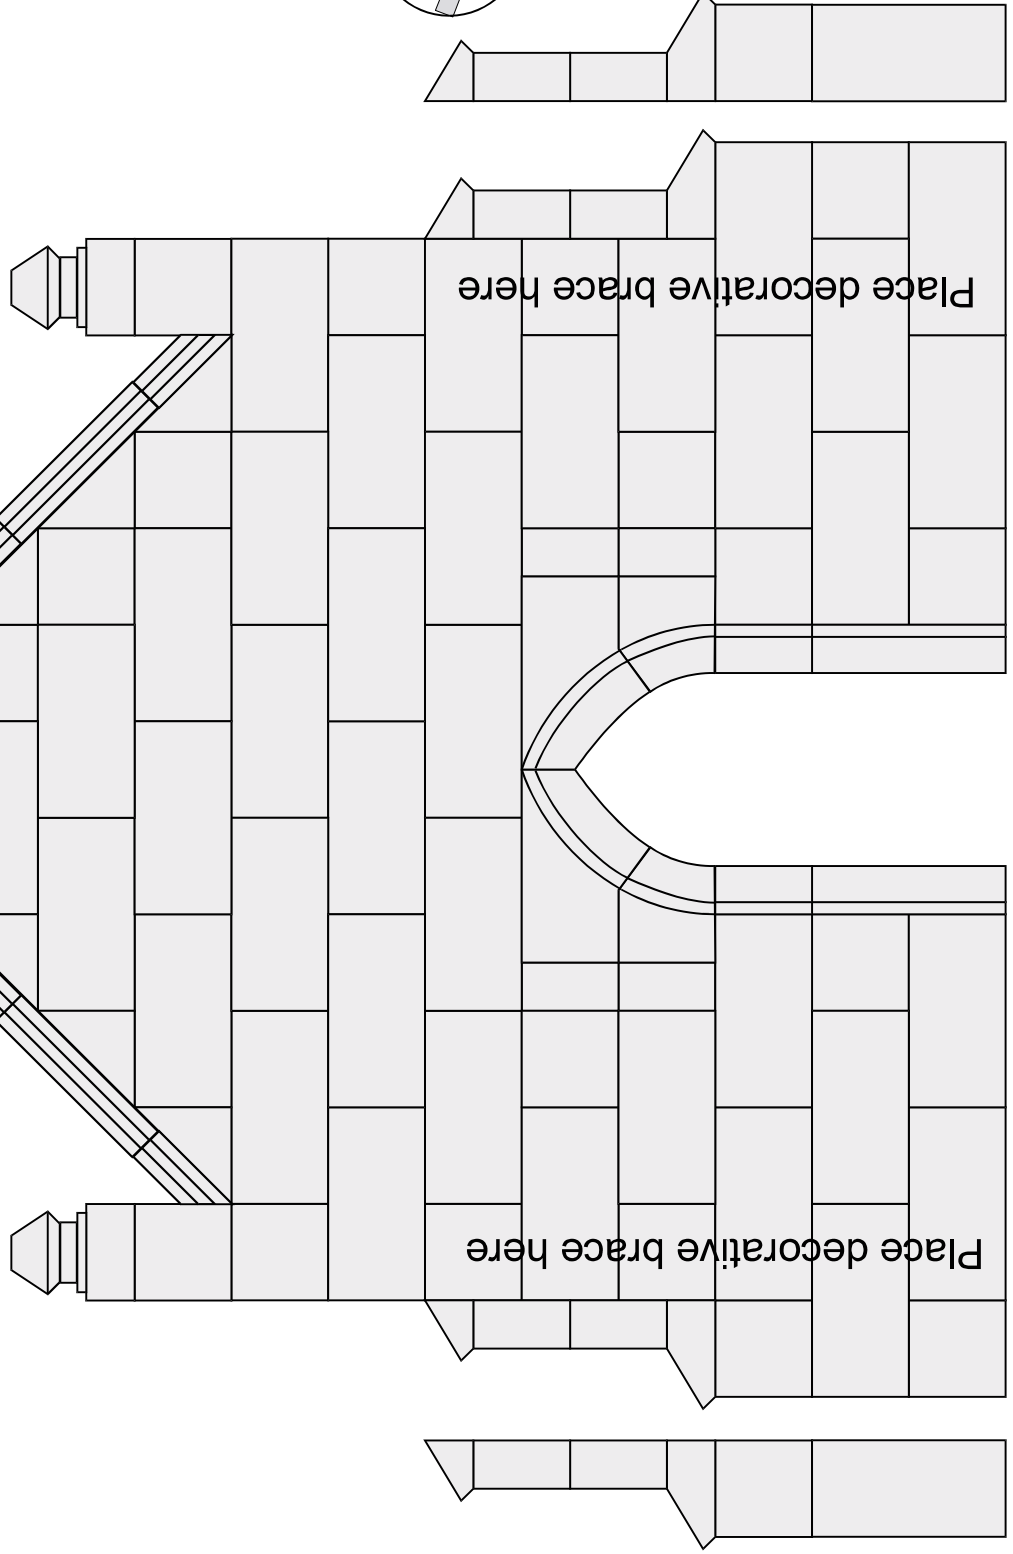

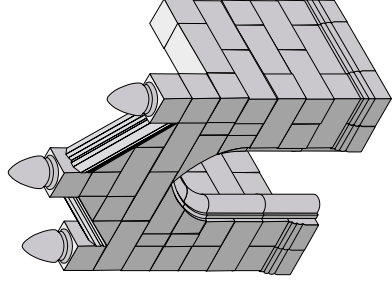

Assemble and glue the 2 side braces. Glue the flat side of these braces onto the wall indicated by the light shaded area.

Angled roof block goes here on **back** of wall.

Miter the edges of these 2 blocks so they'll fit against this side of the church

Assemble the foyer above. It will rest against this side of the church and have its own small roof.
