

Wizard's Tower

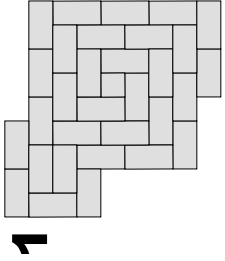

Floorplan Layout

This sheet shows a brick-by-brick layout of the wizard's tower. Step 1 is the floor, all the way up to level 16 which is the top of the tower.

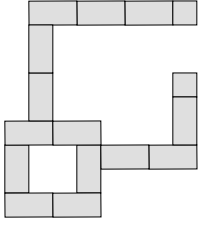

Place your blocks directly on this full size floor plan and glue them together (not to the paper). When dry, remove it from the paper so you can easily read the remaining directions.

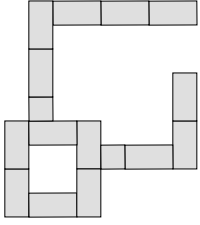

If you intend to take this model apart in sections, be sure that you mark where "not to glue" using a magic marker on the blocks. These marks will serve as a reminder for you later on (it's real easy to forget and end up gluing the whole thing together).
